I reviewed your method for NCDEQ. I think you monitor a couple that are not needed and I stated so (some of the PFECAs that end in A, B, C, D or E...but I don't recall which ones). They are remnants from the Mei Sun paper as we had no standards then for many analytes. I also see you have a poster at ACS. We can chat next week.

Mark

Hi Mark,

Thanks for the message and good to know that the paper will be published soon. As to your question regarding the analyte list, I believe most of them (at least the ones we have finalized the structure) are on our latest method.

Thanks,
Lam

External email. Confirm links and attachments before opening.

Lam,

FYI we submitted our galleys back to ES&T yesterday. They say it will take 24-27 hrs to go live. However we have a paper embargo from ES&T that will include a press release before it goes live. I hope it is out in the next week.

FYI, I am now looking if I have a chance, that all PFAS we note in our Tables are on your methods list for water. I believe they all are.

Mark
